## MINING AROUND MODENA. Breezy Mention of Men and Mines in Over 400 Men Are Now Prospecting Interesting Country.

Modena, Utah, Jan. 22.—Six teams,

Modena, Utah, Jan. 22.—Six teams, carrying over 3,000 linear feet of heavy mining timber for the Bamberger-De Lamar Gold Mining company, passed through here yesterday en route from Parowan valley to De Lamar.

Two strongly equipped mining outfits preceded by several experts in a lighter light and the best equipped that have so far passed through here, being furnished with complete assay and mining tools and appurtenances. They reached here over the old Ploche road from Milford. The parties in charge declined to dis-

## NEWHOUSE'S ENTERPRISE. His Visit to New York Brings Out

Comment on Cactus.

Samuel Newhouse is expected to reach New York on Thursday from Salt Lake, where he has been looking over the final details for starting the new mill of the Newhouse Mines & Smelter company near Friseo, says the New York Commercial. His arrival in New York is also awaited with considerable interest in connection with the reported interview in which he is alleged to have stated that he was considering the matter of taking up the managing directorship of the Majestic Copper company of Hartford, Conn. likewise located in Beaver county, Utah. The fact that this story has been partially denied in New York lends additional interest to his return here.

L. N. Kramer, vice president of the Newhouse company, said vesterday that it had now been definitely settled that the 1,000-ton mill of the company would be put in commission not later than Feb. 1. The plant in question is a large concentrator, whose capacity can be increased as further needs may justify. Power has been secured for a 2,000-ton mill, which additional plant, if present plans do not miscarry, should be in operation not later than Oct, 15 of the present year.

Nearly 6,000,000 Tons of Ore.

BEING HURKIED UP.

Notwithstanding a healthy growth in subscribers was provided for with last issue of the directory, it has so far ex-Seeded expectations that the supply of books is exhausted, and the new book is being hurried to completion. It will be had now over 7,500 subscribers in Salt Lake—a growth of over 1,600 since July 1st, 1904, and over 200 for the half month ending January 15th, 1905.

whatever amount of this high-grade ore sencountered will be shipped to outside smelters for treatment. From the mid-dle of February the plant will produce copper at the rate of 22,500,000 pounds per annum, and from next October this production will be increased, as now fig-lined, to 40,000,000 pounds a year.

## KAWITCH DISCOVERIES.

in the New District.

in the New District.

Reports received yesterday from the scene of the hew discoveries in the Kashen scene of the published ingregard to that section, says the Guidfield Review. Several strong ledges carrying values as high as \$500,a ton have been uncovered on Quartz. The mountain, less than a mile south of the original discovery, and a number of important strikes are reported at different points to the east and north.

The surrounding country is swarming with prespectors, it being estimated that there are now about 400 men in the new district. The Goldreed company is working a force of miners under the personal supervision of Ralph Wardle, who this week resigned his position as mine superintendent for the Tonopah. Mr. Wardle, who is one of the best miners in the west, owns a large interest in the new discoveries, and excellent work is assured under his management.

WOODRIVER'S ZINC MILL.

true merits of the camp are disclosed by "real" mining.

Down at Pioche the property of the Pioche-Nevada Consolidated Mining company, under the superintendence of Charles Rives, is responding surprisingly, and as depth is being attained the ore bodies are widening at a rate that is more than gratifying to the stockholders. Even Mr. Rives, who has had much experience in mining galena ores and who is noted for much soberness of countenance, is said to lately have given way to elation and has to carry a chunk of galena in each pocket to hold him down, as it were.

James Long, said to belong to one of the construction forces of the San Pedro, made an inspection of the Time Check group yesterday for the purpose of sizing up the body of ballasting material obtainable, and incidentally to view the recent strike of gold ore in the same property. Mr. Long's measurements of the principal visible body of "leached granite" show the available supply for ballasting to be 345 feet wide, 25 feet long, with a visible average depth of twenty-five feet, and therefore containing 1,078,125 cubic feet, which, on a basis of forty cubic feet to the ton, would yield about 270,000 tons.

# NEW TELEPHONE BOOK IS

BEING HURRIED UP.

Notwithstanding a healthy growth in subscribers was provided for with last issue of the directory, it has so far exceeded expectations that the supply of books is exhausted, and the new book is being hurried to completion. It will show over 7,500 subscribers in Salt Lake—a growth of over 1,600 since July 1st, 1904, and over 200 for the half month ending January 15th, 1905.

## PTOMAINE POISONING.

PROBATE AND GUARDIANSHIP NOTICES.

Consult County Clerk or the respective signers for further information. IN THE DISTRICT COURT, PRObate division, in and for Salt Lake county, State of Utah. In the matter of the estate of Don R. Coray, deceased, Notice.—The petition of Elizabeth H. Coray praying for the issuance to herself of letters of administration in the estate of Don R. Coray, deceased, has been set for hearing on Saturday, the 28th day of January, A. D. 1905, at 10 o'clock a. m. at the county court house, in the court room of said court, in Salt Lake City, Salt Lake county, Utah.

Witness the clerk of the said court (Seal.) with the seal thereof affixed, this lith day of January, A. D. 1905.

By W. H. Farnsworth, Deputy Clerk.
A. L. Hoppaugh, Attorney for Petitioner

and-appurtenances. They reached here over the old Ploche road from Milford. The parties in charge declined to disclose their identity, and beyond the fact that, they came from the north and that Salt Lake capital was back of the enterprise, nothing could be gleaned. One of the principals was fully posted as to this country and had evidently been to Goldfield, as he exhibited a rich specimen of ore from that section.

The Desert Wonder group of mining claims, owned by H. W. Forman of Minturn, Colo, and associates, has been undergoing considerable examination by various parties during the past week, and it is understood that active exploitation of the property is being contemplated by several parties besides the owners within the next thirty days. It is claimed that a representative of the Majestic company has examined the ground and is much taken with a deposit of hematite occurring in the property and which gives promise, of opening up a large body of iron fluxing material acide from any precious metals that may be encountered.

W. J. McBurney of Stateline, principal work in the Crosle company, and which gives promise, of opening up a large body of iron fluxing material acide from any precious metals that may be encountered.

W. J. McBurney of Stateline, principal owner in the Crosle company, and which gives promise of opening up a large body of iron fluxing material acide from any precious metals that may be encountered.

W. J. McBurney of Stateline, principal owner in the Crosle company, and the company of the the compa W. J. McBurney of Stateline, principal owner in the Creole company, and various properties of that camp, has been looking up conditions about Modena for the past several days. He reports Stateline very sluggish at present, but expresses confidence in the future outcome of things there. The Venus company is the only one working at present, but Mr. Burney expresses himself as having camped there to remain until the reawakening arrives and the frue merits of the camp are disclosed by "real" mining.

further needs may justify. Power has been secured for a 2.000-ton mill, which additional plant, if present plans do not miscarry, should be in operation not later than Oct. 15 of the present year.

Nearly 6,000,000 Tons of Ore.

Work has been carried on at the Cactus mine, the property which furnishes the basis for the operations of the Newhouse company for the past five years, with the result that it is estimated that nearly 8,000,000 tons of ore have been shown up. The ore will not average over \$a\$ ton, and consists of gold, copper and silver values. According to the present plans it is gauged that the copper produced will not cost the company over 5 cents a pound, by reason of the by-product of gold and silver which is found in the ore. The main working tunnel at the property is over 6,000 feet long, and in the course of the bore numerous veins were cut some of which average over 125 feet wide. Some copper ore has been found that will average over 40 per cent, but the course of the bore numerous veins were cut, some of which average over 125 feet wide. Some copper ore has been found that will average over 40 per cent, but the course of the bore numerous veins were cut, some of which average over 125 feet wide. Some copper ore has been found that will average over 40 per cent, but the course of the bore numerous veins were cut, some of which average over 125 feet building. Telephone 1120 K.
